The Pick o' the Dahlias

1925

J. L. CALLAGHAN
GROWER OF FINE
DAHLIAS and GLADIOLI
3408 WEBSTER STREET
OAKLAND, CALIFORNIA

Piedmont 1081-W

The following list embraces the best in California Dahlias, with a few of the finest importations.

You know we raise the Best Dahlias in the World, around San Francisco Bay, on account of our mild and moist climate and long growing season.

The color descriptions are as truthful as it is possible to describe a flower, but certain allowances should be made for variation, caused by different soils and climate conditions.

With the exception of a very few, every Dahlia listed here is a Prize Winner in either the Oakland or San Francisco Dahlia Shows and a Dahlia has to be some Dahlia to win a Prize in these contests.

If you know Dahlias you will appreciate what I am offering. If you don't, order some of these and find out what real Dahlias are like.

To those who are unacquainted with the different classes and varieties of Dahlias, I would suggest that such leave the selection to me. Send me the amount of money you wish to invest and in return I will send you those that will surely delight. Also my liberal filling of the order will more than be satisfactory.

Assortments of my own selection of extra value: \$5.00 doz., \$10.00 doz., \$15.00 doz., \$20.00 doz.

ORDER EARLY. As orders are received stock will be reserved and sent at proper time.

TERMS. Remittance with order. All retail orders are delivered prepaid.

I Guarantee all tubers true to name, and will cheerfully replace any that should prove otherwise. We do not substitute unless requested.

RAISING GLADIOLUS FROM SEED

For the gardener who does not demand that his garden reward him entirely in its first season, seed planting of Gladiolus has many happy surprises; there is no telling what colors or combinations of colors may be obtained, and sometimes there are many rare prizes.

The seed of the Gladiolus should be planted early in the spring. If the ground is fine, loose, sandy soil, then it is best right in the open ground, like onions in a row. Cover as little as possible with finely sifted sandy soil. If sown in boxes, and started indoors, young plants can be easily transplanted in the open if properly handled.

Some of the seed may produce flowers the first year; others do not appear until the second season. But whether or not the reward is immediate, there will be a nice supply of bulblets which may be sown the following year.

Gladiolus bulblets will grow faster if soaked in water ten or twelve hours before planting, and should not be covered with more than one inch of soil; the ground should be enriched with old manure and worked over good and deep. If given the proper treatment, they will almost all be flowering five months after planting.

H

AVE you ever grown Dahlias from seed? If not, you have missed one of the real

pleasures of gardening, and they are as easy to grow as vegetables. Just imagine, starting a small, tiny seed in a box or flat in February or March and by August to cut a profusion of bloom from a bush four to six feet tall, and from a package of seed most all the colors of the rainbow and no two alike.

This is the way, and the only way, new varieties are created, and you may be lucky enough to develop a few prize winners.

You must not expect to get all good flowers from your planting, no matter how much you pay for your seed or from whom you get it, there will be a few disappointments after blooming time, but the anticipation and pleasure in nursing your seedlings will recompense you for your trouble and, should you produce one of exceptional qualities, what pleasure you would enjoy from one of your own creation, and privileged to name it as you wish.

My seed is gathered from the very finest varieties of Dahlias in a climate that allows the seed to fully mature and ripen on the bush.

I have many glowing letters of appreciation of my seed of last year and from several who were awarded prizes at the Dahlia Shows.

DAHLIA SEED

I make a specialty of Dahlia Seed, gathered from a select collection of the world's best dahlias, planted separate and apart from my general collection for seed purposes.

Our long-growing season and rainless summers make it possible to fully mature and ripen even our full decorative varieties on the bush—something extremely difficult in sections where it is raining during the time seed should set.
